

JNT Series

Sampling Tubes for Remote Access Applications

- Take hot, live oil samples without shutting down.
- Avoid opening the system to external contamination.
- Attach a low purge volume hose assembly for remote access.
- Use a high flow L Series sampling valve and reinforced hose for easy access to difficult locations.

Specifications

Hand Sampling Range: 5 to 300psi (0.3 to 20 bar)

Max Dynamic Sampling: 100psi (7 bar)

Max Operating Pressure: 500psi (34 bar)

Viton Seal Temperature: -15 to +400°F (-26 to +204°C)

Nitrile Seal Temperature: -40 to +240°F (-40 to +115°C)
